American International Group, Inc. Cautionary Statement Regarding Forward-Looking Information

This Financial Supplement may include, and officers and representatives of American International Group, Inc. (AIG) may from time to time make and discuss, projections, goals, assumptions and statements that may constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These projections, goals, assumptions and statements are not historical facts but instead represent only a belief regarding future events, many of which, by their nature, are inherently uncertain and outside AIG’s control. These projections, goals, assumptions and statements are often preceded by, followed by or include words such as “will,” “believe,” “anticipate,” “expect,” “intend,” “plan,” “focused on achieving,” “view,” “target,” “goal” or “estimate.” These projections, goals, assumptions and statements may relate to future actions, prospective services or products, future performance or results of current and anticipated services or products, sales efforts, expense reduction efforts, the outcome of contingencies such as legal proceedings, anticipated organizational, business or regulatory changes, the effect of catastrophes, such as the COVID-19 crisis, and macroeconomic events, anticipated dispositions, monetization and/or acquisitions of businesses or assets, or successful integration of acquired businesses, management succession and retention plans, exposure to risk, trends in operations and financial results.

It is possible that AIG’s actual results and financial condition will differ, possibly materially, from the results and financial condition indicated in these projections, goals, assumptions and statements. Factors that could cause AIG’s actual results to differ, possibly materially, from those in the specific projections, goals, assumptions and statements include:

- AIG’s ability to successfully separate the Life and Retirement business and the impact any separation may have on AIG, its businesses, employees, contracts and customers;
- AIG’s ability to close the sale of its Affordable Housing portfolio to an affiliate of Blackstone;
- the occurrence of catastrophic events, both natural and man-made, including COVID-19, other pandemics, civil unrest and the effects of climate change;
- changes in market and industry conditions, including a prolonged global economic recovery, volatility in financial and capital markets, fluctuations in interest rates, inflationary pressures and disruptions to AIG’s operations driven by COVID-19 and responses thereto, including new or changed governmental policy and regulatory actions;
- AIG’s ability to effectively execute on the AIG 200 operational programs designed to modernize AIG’s operating infrastructure and enhance user and customer experiences, and AIG’s ability to achieve anticipated cost savings from AIG 200;
- the impact of potential information technology, cybersecurity or data security breaches, including as a result of cyber-attacks or security vulnerabilities, the likelihood of which may increase due to extended remote business operations as a result of COVID-19;
- availability and affordability of reinsurance;
- disruptions in the availability of AIG’s electronic data systems or those of third parties;
- the impact of COVID-19 generally, including with respect to AIG’s business, financial condition and results of operations;
- changes to the valuation of AIG’s investments;
- actions by rating agencies with respect to AIG’s credit and financial strength ratings as well as those of its businesses and subsidiaries;
- the effectiveness of AIG’s enterprise risk management policies and procedures, including with respect to business continuity and disaster recovery plans;
- changes in judgments concerning the recognition of deferred tax assets and the impairment of goodwill;
- AIG’s ability to successfully dispose of, monetize and/or acquire businesses or assets or successfully integrate acquired businesses;
- nonperformance or defaults by counterparties, including Fortitude Reinsurance Company Ltd. (Fortitude Re);
- the effectiveness of strategies to recruit and retain key personnel and to implement effective succession plans;
- changes in judgments concerning potential cost-saving opportunities;
- concentrations in AIG’s investment portfolios;
- changes to our sources of or access to liquidity;
- changes in judgments or assumptions concerning insurance underwriting and insurance liabilities;
- the requirements, which may change from time to time, of the global regulatory framework to which AIG is subject;
- significant legal, regulatory or governmental proceedings; and
- such other factors discussed in Part I, Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations (MD&A) in AIG’s Quarterly Report on Form 10-Q for the quarterly period ended September 30, 2021 (which will be filed with the Securities and Exchange Commission), Part I, Item 2. MD&A in AIG’s Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2021, Part I, Item 2. MD&A in AIG’s Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2021 and Part I, Item 1A. Risk Factors and Part II, Item 7. MD&A in AIG’s Annual Report on Form 10-K for the year ended December 31, 2020.

AIG is not under any obligation (and expressly disclaims any obligation) to update or alter any projections, goals, assumptions or other statements, whether written or oral, that may be made from time to time, whether as a result of new information, future events or otherwise.

Overview

Segment Reporting

To align financial reporting with AIG's chief operating decision makers' view of AIG's businesses and how they allocate resources and assess performance, we present our segments as follows:

General Insurance

General Insurance continues to be reported with the following operating segments:

- North America – primarily includes insurance businesses in the United States, Canada and Bermuda, and our global reinsurance business, AIG Re.
- International – includes regional insurance businesses in Japan, the United Kingdom, Europe, Middle East and Africa (EMEA region), Asia Pacific, Latin America and Caribbean, and China. International also includes the results of Talbot Holdings, Ltd as well as AIG's global specialty business.

Additionally, our chief operating decision makers determined the performance review of these operating segments to be based on the underwriting profit of the segments.

Life and Retirement

Life and Retirement continues to be reported with the following operating segments:

- Individual Retirement – consists of fixed annuities, fixed index annuities, variable annuities and retail mutual funds.
- Group Retirement – consists of group mutual funds, group annuities, individual annuity and investment products, financial planning and advisory services, and plan administrative and compliance services.
- Life Insurance – primary products in the U.S. include term life and universal life insurance. International operations include distribution of life and health products in the UK and Ireland. Certain run-off life insurance portfolios previously reported in our Legacy segment have been realigned into the Life Insurance operating segment.
- Institutional Markets – consists of stable value wrap products, structured settlement and pension risk transfer annuities, corporate- and bank-owned life insurance, high net worth products and guaranteed investment contracts (GICs).

On October 26, 2020, AIG announced its intention to separate its Life and Retirement business from AIG. On July 14, 2021, AIG and Blackstone Inc. (Blackstone) announced that they have reached a definitive agreement for Blackstone to acquire a 9.9 percent equity stake in SAFG Retirement Services, Inc. (SAFG), which is the holding company for AIG's Life and Retirement business, for \$2.2 billion in an all cash transaction, subject to adjustment if the final pro forma adjusted book value is greater or lesser than the target pro forma adjusted book value. The transaction contemplates that most of AIG's investment operations would be transferred to SAFG or its subsidiaries as part of the separation. As part of this agreement, AIG also agreed to enter into a long-term asset management relationship with Blackstone to manage an initial \$50 billion of Life and Retirement's existing investment portfolio upon closing of the equity investment, with that amount increasing by increments of \$8.5 billion per year for the next five years beginning in the fourth quarter of 2022, for an aggregate of \$92.5 billion. These transactions closed on November 2, 2021. While we currently believe an initial public offering is the next step in the separation of the Life and Retirement business from AIG, no assurance can be given regarding the form that a separation transaction may take or the specific terms or timing thereof, or that a separation will in fact occur. Any separation transaction will be subject to the satisfaction of various conditions and approvals, including approval by the AIG Board of Directors, receipt of insurance and other required regulatory approvals, and satisfaction of any applicable requirements of the Securities and Exchange Commission (SEC).

On July 14, 2021, AIG and Blackstone Real Estate Income Trust (BREIT), a long-term, perpetual capital vehicle affiliated with Blackstone, announced that they have reached a definitive agreement for BREIT to acquire AIG's interests in a U.S. Affordable Housing portfolio for approximately \$5.1 billion, subject to certain adjustments, in an all cash transaction. As of September 30, 2021, the assets, primarily real estate investments and liabilities, primarily debt of consolidated investment entities, related to the Affordable Housing portfolio, \$4.3 billion and \$2.7 billion, respectively, are classified as held for sale and are reported in Other assets and Other liabilities within our Condensed Consolidated Balance Sheets. This transaction is subject to customary closing conditions and is expected to close in the fourth quarter of 2021.

American International Group, Inc.

Overview

On February 8, 2021, AIG announced the execution of a definitive agreement with Touchstone, an indirect wholly-owned subsidiary of Western & Southern Financial Group, to sell certain assets of AIG Life and Retirement's Retail Mutual Funds business. The transaction closed on July 16, 2021 at which time we received initial proceeds, and twelve retail mutual funds managed by SAAMCo, a member of AIG Life and Retirement, with \$6.8 billion in assets, were reorganized into Touchstone funds. Additional proceeds may be earned over a three-year period based on asset levels in certain reorganized funds. Six retail mutual funds managed by SAAMCo and not included in the transaction were liquidated. AIG Life and Retirement will retain its fund management platform and capabilities dedicated to its variable annuity insurance products.

Other Operations

Other Operations primarily consists of income from assets held by AIG Parent and other corporate subsidiaries, deferred tax assets related to tax attributes, corporate expenses and intercompany eliminations, our institutional asset management business and results of our consolidated investment entities, General Insurance portfolios in run-off previously reported within Legacy as well as the historical results of our legacy insurance lines ceded to Fortitude Re.

American International Group, Inc. Non-GAAP Financial Measures

Throughout this Financial Supplement, we present our financial condition and results of operations in the way we believe will be most meaningful and representative of our business results. Some of the measurements we use are “Non-GAAP financial measures” under Securities and Exchange Commission rules and regulations. GAAP is the acronym for generally accepted accounting principles in the United States. The non-GAAP financial measures we present may not be comparable to similarly-named measures reported by other companies.

We use the following operating performance measures because we believe they enhance the understanding of the underlying profitability of continuing operations and trends of our business segments. We believe they also allow for more meaningful comparisons with our insurance competitors. When we use these measures, reconciliations to the most comparable GAAP measure are provided on a consolidated basis.

Adjusted Pre-tax Income (APTI) is derived by excluding the items set forth below from income from continuing operations before income tax. This definition is consistent across our segments. These items generally fall into one or more of the following broad categories: legacy matters having no relevance to our current businesses or operating performance; adjustments to enhance transparency to the underlying economics of transactions; and measures that we believe to be common to the industry. APTI is a GAAP measure for our segments. Excluded items include the following:

- changes in fair value of securities used to hedge guaranteed living benefits;
- changes in benefit reserves and deferred policy acquisition costs (DAC), value of business acquired (VOBA), and sales inducement assets (SIA) related to net realized gains and losses;
- changes in the fair value of equity securities;
- net investment income on Fortitude Re funds withheld assets held by AIG in support of Fortitude Re’s reinsurance obligations to AIG post deconsolidation of Fortitude Re (Fortitude Re funds withheld assets);
- following deconsolidation of Fortitude Re, net realized gains and losses on Fortitude Re funds withheld assets;
- loss (gain) on extinguishment of debt;
- all net realized gains and losses except earned income (periodic settlements and changes in settlement accruals) on derivative instruments used for non-qualifying (economic) hedging or for asset replication. Earned income on such economic hedges is reclassified from net realized gains and losses to specific APTI line items based on the economic risk being hedged (e.g. net investment income and interest credited to policyholder account balances);
- income or loss from discontinued operations;
- net loss reserve discount benefit (charge);
- pension expense related to a one-time lump sum payment to former employees;
- income and loss from divestitures;
- non-operating litigation reserves and settlements;
- restructuring and other costs related to initiatives designed to reduce operating expenses, improve efficiency and simplify our organization;
- the portion of favorable or unfavorable prior year reserve development for which we have ceded the risk under retroactive reinsurance agreements and related changes in amortization of the deferred gain;
- integration and transaction costs associated with acquiring or divesting businesses;
- losses from the impairment of goodwill; and
- non-recurring costs associated with the implementation of non-ordinary course legal or regulatory changes or changes to accounting principles.

Adjusted After-tax Income attributable to AIG common shareholders (AATI) is derived by excluding the tax effected adjusted pre-tax income (APTI) adjustments described above, dividends on preferred stock, and the following tax items from net income attributable to AIG:

- deferred income tax valuation allowance releases and charges;
 - changes in uncertain tax positions and other tax items related to legacy matters having no relevance to our current businesses or operating performance; and
 - net tax charge related to the enactment of the Tax Cuts and Jobs Act (Tax Act);
- and by excluding the net realized gains (losses) and other charges from noncontrolling interests.

Book Value per Common Share, Excluding Accumulated Other Comprehensive Income (Loss) (AOCI) adjusted for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets and Deferred Tax Assets (DTA) (Adjusted Book Value per Common Share) is used to show the amount of our net worth on a per-common share basis after eliminating items that can fluctuate significantly from period to period including changes in fair value of AIG’s available for sale securities portfolio, foreign currency translation adjustments and U.S. tax attribute deferred tax assets. This measure also eliminates the asymmetrical impact resulting from changes in fair value of our available for sale securities portfolio wherein there is largely no offsetting impact for certain related insurance liabilities. In addition, we adjust for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets since these fair value movements are economically transferred to Fortitude Re. We exclude deferred tax assets representing U.S. tax attributes related to net operating loss carryforwards and foreign tax credits as they have not yet been utilized. Amounts for interim periods are estimates based on projections of full-year attribute utilization. As net operating loss carryforwards and foreign tax credits are utilized, the portion of the DTA utilized is included in these book value per common share metrics. Adjusted Book Value per Common Share is derived by dividing Total AIG common shareholders’ equity, excluding AOI adjusted for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets, and DTA (**Adjusted Common Shareholders’ Equity**), by total common shares outstanding. The reconciliation to book value per common share, the most comparable GAAP measure, is presented on page 66 herein.

Book Value per Common Share, Excluding Goodwill, Value of Business Acquired (VOBA), Value of Distribution Channel Acquired (VODA), Other Intangible Assets, AOI adjusted for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets, and Deferred Tax Assets (DTA) (Adjusted Tangible Book Value per Common Share) is used to provide more accurate measure of the realizable value of shareholder on a per-common share basis. Adjusted Tangible Book Value per Common Share is derived by dividing Total AIG common shareholders’ equity, excluding intangible assets, AOI adjusted for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets, and DTA (**Adjusted Tangible Common Shareholders’ Equity**), by total common shares outstanding. The reconciliation to book value per common share, the most comparable GAAP measure, is presented on page 66 herein.

American International Group, Inc. Non-GAAP Financial Measures (Cont.)

AIG Return on Common Equity (ROCE) – Adjusted After-tax Income Excluding AOCI adjusted for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets and DTA (Adjusted Return on Common Equity) is used to show the rate of return on common shareholders' equity. We believe this measure is useful to investors because it eliminates items that can fluctuate significantly from period to period, including changes in fair value of our available for sale securities portfolio, foreign currency translation adjustments and U.S. tax attribute deferred tax assets. This measure also eliminates the asymmetrical impact resulting from changes in fair value of our available for sale securities portfolio wherein there is largely no offsetting impact for certain related insurance liabilities. In addition, we adjust for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets since these fair value movements are economically transferred to Fortitude Re. We exclude deferred tax assets representing U.S. tax attributes related to net operating loss carryforwards and foreign tax credits as they have not yet been utilized. Amounts for interim periods are estimates based on projections of full-year attribute utilization. As net operating loss carryforwards and foreign tax credits are utilized, the portion of the DTA utilized is included in Adjusted Return on Common Equity. Adjusted Return on Common Equity is derived by dividing actual or annualized adjusted after-tax income attributable to AIG common shareholders by average Adjusted Common Shareholders' Equity. The reconciliation to return on common equity, the most comparable GAAP measure, is presented on page 67 herein.

AIG Return on Common Equity – Adjusted After-tax Income, Excluding Goodwill, VOBA, VODA and Other Intangible assets, AOCI adjusted for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets, and DTA (Adjusted Return on Tangible Common Equity) is used to provide the rate of return on adjusted tangible common shareholder's equity, which is a more accurate measure of realizable shareholder value. We exclude Goodwill, VOBA, VODA and Other intangible assets from AIG common shareholders' equity to derive tangible common shareholders' equity and we further exclude AOCI adjusted for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets, and DTA for Adjusted Tangible Common Equity. Adjusted Return on Tangible Common Equity is derived by dividing actual or annualized adjusted after-tax income attributable to AIG common shareholders by average Adjusted Tangible Common Shareholders' Equity. The reconciliation to return on common equity, the most comparable GAAP measure, is presented on page 67 herein.

General Insurance and Life and Retirement Adjusted Segment Common Equity is based on segment equity adjusted for the attribution of debt and preferred stock (Segment Common Equity) and is consistent with AIG's Adjusted Common Shareholders' Equity definition. The reconciliations to Segment Common Equity are presented on pages 70 herein.

General Insurance and Life and Retirement Return on Adjusted Segment Common Equity – Adjusted After-tax Income (Return on Adjusted Segment Common Equity) is used to show the rate of return on Adjusted Segment Common Equity. Return on Adjusted Segment Common Equity is derived by dividing actual or annualized Adjusted After-tax Income by Average Adjusted Segment Common Equity. The reconciliations to Return on Adjusted Segment Common Equity are presented on pages 15 and 29 herein.

Adjusted After-tax Income Attributable to General Insurance and Life and Retirement is derived by subtracting attributed interest expense, income tax expense and attributed dividends on preferred stock from APTI. Attributed debt and the related interest expense and dividends on preferred stock are calculated based on our internal allocation model. Tax expense or benefit is calculated based on an internal attribution methodology that considers among other things the taxing jurisdiction in which the segments conduct business, as well as the deductibility of expenses in those jurisdictions. The reconciliations from Adjusted pre-tax income to Adjusted after-tax income attributed to General Insurance and Life and Retirement are presented on pages 15 and 29 herein.

Adjusted Revenues exclude Net realized gains (losses), income from non-operating litigation settlements (included in Other income for GAAP purposes) and changes in fair value of securities used to hedge guaranteed living benefits (included in Net investment income for GAAP purposes). Adjusted revenues is a GAAP measure for our segments.

Ratios: We, along with most property and casualty insurance companies, use the loss ratio, the expense ratio and the combined ratio as measures of underwriting performance. These ratios are relative measurements that describe, for every \$100 of net premiums earned, the amount of losses and loss adjustment expenses (which for General Insurance excludes net loss reserve discount), and the amount of other underwriting expenses that would be incurred. A combined ratio of less than 100 indicates underwriting income and a combined ratio of over 100 indicates an underwriting loss. Our ratios are calculated using the relevant segment information calculated under GAAP, and thus may not be comparable to similar ratios calculated for regulatory reporting purposes. The underwriting environment varies across countries and products, as does the degree of litigation activity, all of which affect such ratios. In addition, investment returns, local taxes, cost of capital, regulation, product type and competition can have an effect on pricing and consequently on profitability as reflected in underwriting income and associated ratios.

Accident year loss and Accident year combined ratios, as adjusted: both the accident year loss and accident year combined ratios, as adjusted, exclude catastrophe losses and related reinstatement premiums, prior year development, net of premium adjustments, and the impact of reserve discounting. We believe that as adjusted ratios are meaningful measures of our underwriting results on an ongoing basis as they exclude catastrophes and the impact of reserve discounting which are outside of management's control. We also exclude prior year development to provide transparency related to current accident year results.

Underwriting ratios are computed as follows:

- a) Loss ratio = Loss and loss adjustment expenses incurred ÷ Net premiums earned (NPE)
- b) Acquisition ratio = Total acquisition expenses ÷ NPE
- c) General operating expense ratio = General operating expenses ÷ NPE
- d) Expense ratio = Acquisition ratio + General operating expense ratio
- e) Combined ratio = Loss ratio + Expense ratio
- f) Catastrophe losses (CATs) and reinstatement premiums = [Loss and loss adjustment expenses incurred – (CATs)] ÷ [NPE +/- CYRIPs] – Loss ratio
- g) Accident year loss ratio, as adjusted (AYLR) = [Loss and loss adjustment expenses incurred – CATs – PYD] ÷ [NPE +/- Reinstatement premiums related to current year catastrophes (CYRIPs) +/- RIPs related to prior year catastrophes (PYRIPs) + (Additional) returned premium related to PYD on loss sensitive business ((AP)RP) + Adjustment for ceded premiums under reinsurance contracts related to prior accident years]
- h) Accident year combined ratio, as adjusted = AYLR + Expense ratio
- i) Prior year development net of (additional) return premium related to PYD on loss sensitive business = [Loss and loss adjustment expenses incurred – CATs – PYD] ÷ [NPE +/- CYRIPs +/- PYRIPs + (AP)RP] – Loss ratio – CAT ratio

American International Group, Inc. Non-GAAP Financial Measures (Cont.)

Premiums and deposits: includes direct and assumed amounts received and earned on traditional life insurance policies, group benefit policies and life-contingent payout annuities, as well as deposits received on universal life, investment-type annuity contracts, Federal Home Loan Bank (FHLB) funding agreements and mutual funds.

Results from discontinued operations are excluded from all of these measures.

Key Terms - Throughout this Financial Supplement, we use the following terms:

Natural catastrophe losses are generally weather or seismic events having a net impact on AIG in excess of \$10 million each and man-made catastrophe losses, such as terrorism and civil disorders that exceed the \$10 million threshold.

Alternative investment income includes income on hedge funds, private equity funds and affordable housing partnerships. Hedge funds for which we elected the fair value option are recorded as of the balance sheet date. Private equity funds are generally reported on a one-quarter lag. We use a 6% expected rate of return for the better (worse) than expected alternative investments line item for all periods presented herein.

Consolidated Notes

- (1) For the three months ended December 31, 2020 and the nine months ended September 30, 2020, because we reported a net loss attributable to AIG common shareholders from continuing operations, all common stock equivalents were anti-dilutive and are therefore excluded from the calculation of diluted shares and diluted per share amounts. The shares excluded from the diluted EPS calculation were 8,309,281 shares and 4,432,369 shares in the same periods, respectively.
- (2) See discussion of Life and Retirement segment on page 2.
- (3) Hybrid - debt securities, financial debt and syndicated credit facility are attributed to our reportable segments and Other Operations.
- (4) Syndicated credit facility represents the \$1.3 billion we borrowed under our \$4.5 billion revolving syndicated credit facility on March 20, 2020 and repaid in June 2020.
- (5) Represents alternative investment income including income on hedge funds, private equity funds and affordable housing partnerships. Hedge funds for which we elected the fair value option are recorded as of the balance sheet date. Private equity funds are generally reported on a one-quarter lag. We use a 6% expected rate of return for the better (worse) than expected alternative investments line item for all periods presented herein.
- (6) Represents the impact of fair value changes included in APTI on the Fixed Maturity Securities – Other accounted under the fair value option, rather than their impact on the income from continuing operations before tax expense. We use a 4% expected rate of return to calculate the better (worse) than expected fair value changes on the Fixed Maturity Securities – Other line item for all periods presented herein.
- (7) Interest and dividends, alternative investments and other investments income (loss) in 2Q20 were reclassified in 3Q20 resulting in an increase of other investment income (loss) of \$113 million and a decrease in alternative investments and interest and dividends of \$13 million and \$100 million, respectively. The reclassification has no impact to net investment income - excluding Fortitude Re funds withheld assets or total net investment income.
- (8) Prior to June 2, 2020, noncontrolling interests was primarily due to the 19.9 percent investment in Fortitude Holdings by an affiliate of Carlyle, which occurred in the fourth quarter of 2018. Carlyle was allocated 19.9 percent of Fortitude Holdings' standalone financial results through the June 2, 2020 closing date of the Majority Interest Fortitude Sale. Fortitude Holdings' results were mostly eliminated in AIG's consolidated income from continuing operations given that its results arose from intercompany transactions. Noncontrolling interests was calculated based on the standalone financial results of Fortitude Holdings. The most significant component of Fortitude Holdings' standalone results was the change in fair value of the embedded derivatives which changes with movements in interest rates and credit spreads, and which was recorded in net realized gains and losses of Fortitude Holdings. In accordance with AIG's adjusted after-tax income definition, net realized gains and losses are excluded from noncontrolling interests. Subsequent to the Majority Interest Fortitude Sale, AIG owns 3.5 percent of Fortitude Holdings and no longer consolidates Fortitude Holdings in its financial statements as of such date. The minority interest in Fortitude Holdings is carried at cost within AIG's Other invested assets, which was \$100 million as of September 30, 2021. Fortitude Holdings' summarized financial information (standalone results), prior to the Majority Interest Fortitude Sale is presented below:

* Favorable prior year development during the three months ended Sept 30, 2021 was largely driven by favorable Adverse Development Cover amortization with favorable development on Workers Compensation, global short-tailed lines and Personal Insurance including catastrophes, offset by reserve strengthening in Financial Lines (US and International). Favorable catastrophe development in Personal Insurance reduced overall recoveries from a Catastrophe aggregate treaty lowering the net benefit to Personal Insurance as well as adversely impacting the net position in certain Commercial Lines. Favorable prior year development during the three months ended June 30, 2021 was largely driven by favorable Adverse Development Cover amortization with favorable Workers Compensation development offset by unfavorable US Short-tailed lines and Financial Lines D&O. Favorable prior year development during the three months ended March 31, 2021 was largely driven by favorable Adverse Development Cover amortization. Unfavorable prior year development during the three months ended December 31, 2020 is primarily related to unfavorable development due to severity increases in US Financial Lines and Excess Casualty offset by favorable loss emergence from Workers Compensation and International Short tailed lines and Adverse Development Cover amortization. Unfavorable prior year development during the three months ended September 30, 2020 is primarily related to International Financial Lines and Casualty driven by increased large losses, partially offset by favorable development in US Workers Compensation and other short-tailed lines in International Property and Specialty and the Adverse Development Cover amortization.

American International Group, Inc.
General Insurance Notes

- (1) AIG participates in the market for insurance-linked securities (ILS) primarily through AlphaCat Managers, Ltd. (AlphaCat). AlphaCat is an asset manager of various funds, managed accounts and sidecars capitalized by third-party investors and Validus. Total assets under management by AlphaCat is \$3.5 billion at September 30, 2021 of which \$3.4 billion relates to third-party assets. ILS are financial instruments for which the values are determined based on insurance risk primarily related to natural catastrophes such as earthquakes and hurricanes. We report the investment in the vehicles managed by AlphaCat as Other Invested Assets. Starting 1Q20, on a prospective basis, we report the fee income as a component of Net Investment Income rather than as Miscellaneous Income, a component of Net Premiums Earned. In the three months ended September 30, June 30 and March 31, 2021, December 31 and September 30 2020, we recognized approximately \$0 million, \$6 million, \$(7) million, \$15 million and \$9 million of Net Investment Income (Expense) respectively, of which \$7 million, \$6 million, \$6 million, \$8 million and \$8 million, is the fee income from asset management activities, and \$(7) million, \$0 million, \$(13) million, \$7 million and \$1 million is the income/ (loss) from direct investment activities, respectively.
- (2) Consistent with our definition of APTI, excludes net loss reserve discount and the portion of favorable or unfavorable prior year reserve development for which we have ceded the risk under retroactive reinsurance agreements and related changes in amortization of the deferred gain.
- (3) Computed using current exchange rate for the corresponding periods in the prior year.

American International Group, Inc.
General Insurance - Adverse Development Cover

On January 20, 2017, we entered into an adverse development reinsurance agreement with NICO under which we transferred to NICO 80 percent of the reserve risk on substantially all of our U.S. Commercial long-tail exposures for accident years 2015 and prior.

The table below shows the calculation of the gain on the NICO adverse development reinsurance agreement showing the effect of discounting of loss reserves and amortization of the deferred gain. The deferred gain is amortized over the settlement period of the reinsured losses.

(a) Excludes assumed reinsurance business.

(b) A guaranteed minimum death benefit is an amount paid from a variable annuity upon the death of the owner. This benefit protects beneficiaries from market volatility and may be different than the account value. This benefit may be subject to a maximum amount based on age of owner or dollar amount. "Guaranteed Minimum Death Benefits only" signifies that no other guarantees are present in the contract. Contracts with a guaranteed living benefit also have a guaranteed minimum death benefit, but a policyholder can generally only receive payout from one guaranteed feature, i.e. the features are generally mutually exclusive.

(c) A guaranteed minimum income benefit guarantees a minimum level of periodic income payments upon annuitization.

(d) A guaranteed minimum withdrawal benefit creates a guaranteed income stream which, within certain parameters, may continue for the life of the annuitant even if the entire contract value has been reduced to zero. The fair value of GMWB embedded derivatives is based on actuarial and capital market assumptions related to projected cash flows of rider fees and claims over the expected lives of the contracts.

The following table presents the net increase (decrease) to consolidated pre-tax income from changes in the fair value of the GMWB embedded derivatives and related hedges:

Life and Retirement Notes

- (1) Net investment income (loss) - base portfolio includes interest, dividends, and foreclosed real estate income, net of investment expenses and non-qualifying (economic) hedges.
- (2) Net investment income (loss) - other yield enhancements includes call and tender income, commercial mortgage loan prepayments, changes in market value of investments accounted for under the fair value option, interest received on defaulted investments (other than foreclosed real estate) and other miscellaneous investment income, including income of certain partnership entities that are required to be consolidated.
- (3) Life and Retirement Adjusted pre-tax income in 3Q21 and 3Q20 included the net effect of adjustments to reflect the annual review and update of certain assumptions used to amortize DAC and related items for interest-sensitive products, including life and annuity spreads, mortality rates, lapse rates, fees and separate account long-term asset growth rates. The update of actuarial assumptions also included adjustments to reserves for universal life with secondary guarantees. Consolidated pre-tax income in these periods also included adjustments to the valuation of variable annuity GMWB features that are accounted for as embedded derivatives, primarily due to updated assumptions for lapses, mortality, risk margins and utilization of withdrawal benefits. Changes in the fair value of such embedded derivatives are recorded in net realized gains (losses) and, together with related DAC adjustments, are excluded from APTI. In the aggregate, the net effect of adjustments to reflect the review and update of actuarial assumptions for Life and Retirement products increased (decreased) APTI and pre-tax income as follows:

- (4) Non deferrable insurance commissions and other includes risk charges related to statutory reinsurance that became effective in 2016 of certain life insurance reserves, which resulted in the release of statutory capital. The risk charges are allocated to the Life and Retirement segments on the basis of segment common equity, consistent with the benefit from the reduced capital requirement.
- (5) Assets under administration also enrolled in advisory services and mutual funds or annuities sold through VALIC Financial Advisors and reported in another AIG business unit segment.
- (6) Includes incremental effect on base yield of alternative investments. Quarterly results are annualized.
- (7) Includes incremental effect on base yield of other yield enhancements. Quarterly results are annualized.
- (8) Includes returns from base portfolio including accretion and impacts from holding cash and short-term investments. Quarterly results are annualized.
- (9) Annuity surrender rates represent actual or annualized surrenders and other withdrawals as a percentage of average annuity reserves and Group Retirement mutual fund assets under administration.
- (10) Life and Retirement uses reinsurance, product design and hedging to mitigate risks related to guaranteed benefits in individual annuity contracts. See Part II, Item 7. MD&A – Enterprise Risk Management – Insurance Risks – Life and Retirement Companies’ Key Risks – Variable Annuity Risk Management and Hedging Programs in our Annual Report on Form 10-K for the year ended December 31, 2020 for a discussion of our risk management related to these product features.
- (11) Life Insurance - Other income is primarily related to Laya Healthcare commission and profit sharing revenues received from insurers for distribution of their products.
- (12) Life Insurance sales are shown on a continuous payment premium equivalent (CPPE) basis. Life insurance sales include periodic premiums from new business expected to be collected over a one-year period and 10 percent of unscheduled and single premiums from new and existing policyholders. Sales of accident and health insurance represent annualized first-year premium from new policies.
- (13) Life insurance lapse rates are reported on a 90-day lag basis to include grace period processing.
- (14) See discussion of Life and Retirement segment on page 2.

Other Operations Notes

- (1) At the end of March 2020, Blackboard, AIG's technology-driven subsidiary, was placed into run-off. As a result of this decision, AIG recognized a pre-tax loss of \$210 million, primarily consisting of asset impairment charges; this charge did not impact adjusted pre-tax income.
- (2) General operating expenses include approximately \$18 million per quarter of expenses associated with our handling of claims on behalf of FRL; AIG is compensated fully by FRL for these claims handling services.
- (3) Consolidation and eliminations - consolidated investment entities primarily represents the elimination of intercompany net investment income recorded by General Insurance and Life and Retirement subsidiaries for their investments in consolidated investment entities within Asset Management reported in Other Operations.

Investments Portfolio Results Notes

- (1) Yields/Total Return are calculated using quarterly annualized investment income divided by the average quarterly asset amortized cost for the interim periods. Starting in the second quarter of 2020, for hedge fund investments, annualized yield calculations are based on the average ending carrying value with adjustments for hedge fund redemptions that occurred at the beginning of the quarter. Prior periods have been revised to reflect the annualized yield calculation change in hedge fund investments. In the second quarter of 2020, for purposes of calculating yield/total returns, average amortized cost was adjusted to excluded Fortitude Re withheld assets, consistent with the exclusion of net investment income on Fortitude Re funds withheld assets post deconsolidation of Fortitude Re.
- (2) As of September 30, 2021, our Fixed Maturity Securities - AFS portfolio was approximately 84% fixed rate and 16% variable rate.
- (3) Fixed Maturity Securities - Other are securities for which we elected the fair value option. For Fixed Maturity Securities - Other changes in the fair value of these securities are reported through investment income, which can result in significant fluctuation in the total return.
- (4) Excludes the carrying value of securities used to hedge guaranteed living benefits.
- (5) As of September 30, 2021, our Fixed Maturity Securities - Other portfolio was approximately 37% fixed rate and 63% variable rate.
- (6) Other Invested Assets - Hedge Funds/Private Equity includes investments accounted for under the equity method of accounting, where changes in our share of the net asset values are recorded through investment income or investments where we have elected the fair value option, where changes in the fair value are reported through investment income.
- (7) Other Invested Assets - All Other includes long term time deposits and private common stock. Due to the mix of investments included within this line item and their varied performance, annualized yield is not meaningful and therefore is not presented.
- (8) Consistent with our definition of APTI, we exclude equity securities from our investments and changes in the fair value of equity securities from gross and net investment income-APTI basis. American International Group, Inc. Credit Ratings for Fixed Maturities

Credit Ratings

At September 30, 2021, approximately 88 percent of our fixed maturity securities were held by our domestic entities. Approximately 89 percent of these securities were rated investment grade by one or more of the principal rating agencies. Our investment decision process relies primarily on internally generated fundamental analysis and internal risk ratings. Third-party rating services' ratings and opinions provide one source of independent perspective for consideration in the internal analysis.

Moody's Investors Service Inc. (Moody's), Standard & Poor's Financial Services LLC, a subsidiary of S&P Global Inc. (S&P), or similar foreign rating services rate a significant portion of our foreign entities' fixed maturity securities portfolio. Rating services are not available for some foreign-issued securities. Our Credit Risk Management department closely reviews the credit quality of the foreign portfolio's non-rated fixed maturity securities. At September 30, 2021, approximately 94 percent of such investments were either rated investment grade or, on the basis of our internal analysis, were equivalent from a credit standpoint to securities rated investment grade. Approximately 27 percent of the foreign entities' fixed maturity securities portfolio is comprised of sovereign fixed maturity securities supporting policy liabilities in the country of issuance.

Composite AIG Credit Ratings

With respect to our fixed maturity securities, the credit ratings in the following pages reflect: (a) a composite of the ratings of the three major rating agencies, or when agency ratings are not available, the rating assigned by the NAIC SVO (99 percent of total fixed maturity securities), or (b) our equivalent internal ratings when these investments have not been rated by any of the major rating agencies or the NAIC. The "Non-rated" category in those tables consists of fixed maturity securities that have not been rated by any of the major rating agencies, the NAIC or us.

NAIC Designations of Fixed Maturity Securities

The Securities Valuation Office (SVO) of the National Association of Insurance Commissioners (NAIC) evaluates the investments of U.S. insurers for statutory reporting purposes and assigns fixed maturity securities to one of six categories called 'NAIC Designations.' In general, NAIC Designations of '1' highest quality, or '2' high quality, include fixed maturity securities considered investment grade, while NAIC Designations of '3' through '6' generally include fixed maturity securities referred to as below investment grade. The NAIC has adopted revised rating methodologies for certain structured securities, including non-agency RMBS and CMBS, which are intended to enable a more precise assessment of the value of such structured securities and increase the accuracy in assessing expected losses to better determine the appropriate capital requirement for such structured securities. These methodologies result in an improved NAIC Designation for such securities compared to the rating typically assigned by the three major rating agencies.
